

# Confederation of Tomorrow 2020 Survey

## Detailed Data Tables

### **REPORT 3 – IDENTITY, VALUES AND LANGUAGE**

Field dates: January 13, 2020 – February 20, 2020

The Environics Institute for Survey Research  
33 Bloor Street East, Suite 900  
Toronto, ON M4W 3H1

**Technical note: data for the three territories**

Data presented in these tables are weighted for several factors, including region (province or territory). As a result, the results for the 450 respondents in the three territories are reduced in weight to their proportion of the total Canadian population. This, however, then distorts the results for each individual territory when reported separately, as well as for the north as a region.

For this reason, the survey sample for the three territories was also weighted separately on the basis of gender, age, territory, education and Indigenous identity. This separate weighting was used to generate the results for the territories that appear in the published report. Readers should note therefore that the results in the published report for the three individual territories and for the north as a region differ from those in the tables that follow below.

Tables with the separate weighting for the three territories are available from the Environics Institute upon request.

## Confederation of Tomorrow 2020 Survey

### Banner-Question Key

This detailed set of statistical tables shows survey results for the total general population and also by various subgroups of interest. For this table set there are four “banners” of subgroups drawn from questions in the survey. The results have also been tested for significant differences within these subgroups. The statistical tests undertaken are an independent T-Test for means and independent Z-Test for percentages. The following key shows the questions used to create the banner subgroups and also what groups have been tested for significant differences in each of the banners.

In the tables that follow, **upper case letters** under the percentages indicate subgroup differences that are significant at the **95% level**.
