D1I. We would like to ask you about your own vision for Canada. For each of the following six statements, please let us know whether you agree or disagree that it describes the kind of country you believe Canada should be.
Canada should be a country where there is not a big difference in income between the wealthy and everyone else.

F3AB. In your opinion, to make life more affordable for parents with young children, is it very important, somewhat important, not very important or not at all important for governments in Canada to spend money on each of the following?
Increase funding for child care centres, so that they can create more child care spaces and reduce the fees that parents have to pay for child care.

F3AE. In your opinion, to make life more affordable for parents with young children, is it very important, somewhat important, not very important or not at all important for governments in Canada to spend money on each of the following? Increase the value of tax credits for child care, so that parents who pay for child care can deduct more of these fees from the income taxes they pay to the government.

G17. And what about the child or children? Does your or do any of your children currently have a physical condition; a cognitive difference; an emotional, psychological or mental health condition; or a health problem that limits the amount or the kind of activity that they can do on a typical day? For this question, please consider only conditions or difficulties that have lasted or are expected to last for six months or more.
