Toronto, Ontario M4W 3H1

Banner-Question Key

This detailed set of statistical tables shows survey results for the total general population and also by various subgroups of interest. For this table set there are three "banners" of subgroups, drawn from questions in the survey. The results have also been tested for significant differences within these subgroups. The statistical tests undertaken are an independent T-Test for means and independent Z-Test for percentages. The following key shows the questions used to create the banner subgroups and also what groups have been tested for significant differences in each of the banners.

In the tables that follow, **upper case letters** under the percentages indicate subgroup differences that are significant at the **95% level**.

FOCUS CANADA 2013 – Crime and Justice

Q1. Some people say that crime rates in Canada are decreasing and that it's mainly the dramatic crime stories in the media that are upsetting people.
Other people say   that crime in Canada is really worse than it was before. Which of these two points of view is closest to your own?
