Banner-Question Key

This detailed set of statistical tables shows survey results for the total general population and also by various subgroups of interest. For this table set there are three “banners” of subgroups, drawn from questions in the survey. The results have also been tested for significant differences within these subgroups. The statistical tests undertaken are an independent T-Test for means and independent Z-Test for percentages. The following key shows the questions used to create the banner subgroups and also what groups have been tested for significant differences in each of the banners.

In the tables that follow, **upper case letters** under the percentages indicate subgroup differences that are significant at the **95% level**.

BANNER 1																		
	REGION					SUB-REGION							COMMUNITY SIZE				GENDER	
TOTAL	Atl	QC	ON	Prairies	BC	Tor	Mtl	Vanc.	MB	SK	AB	Can. Excl. QC	1M+	100K-1M	5K-100K	<5K	Male	Female

Q8. Some people [ROTATE] think of taxes as mostly a positive thing because they are how we pay for the important things that make our quality of life good, such as health care, education, and roads. Other people [ROTATE] think of taxes as mostly a negative thing because they take money out of people's pockets and hold back economic growth and the creation of wealth. Which one of these views is closer to you own?

Q37. These new federal laws on sentencing will require your provincial government to spend millions of dollars more on law enforcement and new prisons. Knowing this, would you be just as likely to support these laws, or would you be less supportive?

Subsample: Those who support new laws
